AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1. (Amended) Cosmetic or dermatological preparations comprising:
 - (I) one or more surface-active substances chosen from the group **consisting of:**
 - (Ia) alkyl glucosides, and
 - (Ib) of the disaccharides esterified with one or more four or less fatty acid residues.
 - (II) one or more surface-active substances chosen from the group **consisting of:**
 - (IIa) of glycerol esters of saturated or unsaturated fatty acids,
 - (IIb) of glycol esters of saturated or unsaturated fatty acids, and
 - (IIc) of one or more fatty alcohols chosen from the group of branched and unbranched alkyl alcohols having 12 to 40 carbon atoms.
 - (III) a water phase, and
 - (IV) from 0 to 5% by weight of a lipid phase, based on the total weight of the preparations.
- 2. (Cancel)

3. (Amended) Preparations according to claim 1 or use according to claim 2, characterized in that, wherein the alkyl glucosides are chosen from the group of alkyl glucosides characterized by the structural formula:

where R is a branched or unbranched alkyl radical having 4 to 24 carbon atoms, and where DP is an average degree of glucosylation of up to 2. where is preferably chosen from the group of unbranched alkyl radicals, and where the myristyl radical, the cetyl radical, the stearyl radical and the eicosyl radical are preferred.

4. (Amended) Preparations according to claim 1-or use according to claim 2, characterized in that the, wherein the disaccharides are sucrose esters or the sucrose ester characterized by the structure:

Application No. To Be Assigned Applicant: Gunhild HAMER et al Preliminary Amendment

where $R^1 - R^8$, advantageously independently of one another, can be chosen from the group of hydrogen atoms and branched and unbranched alkanoyl groups having 1-24 carbon atoms. In particular, it is advantageous if up to seven of the radicals $R^4 - R^8$ are hydrogen atoms and one to eight of the radicals $R^4 - R^8$ are chosen from the group of

branched and unbranched alkanoyl groups having 8 20 carbon atoms, of these, in

particular, the lauroyl radical and the myristoyl radical.

5. (Amended) Preparations according to claim 1-or use according to Claim 2, eharacterized in that, wherein the glycerol esters of saturated fatty acids chosen are one or more glycerol esters of wool wax acids.

- 6. (Amended) Preparations according to claim 1 or use according to Claim 2, characterized in that, wherein the fatty alcohol is cetylstearyl alcohol.
- (Amended) Preparations according to claim 1 or use according to Claim 2,
 characterized by an additional content of acrylate/alkyl alkyl acrylate copolymers.
- 8. (New) A method of caring for skin comprising applying thereto a cosmetic or dermatological preparation according to claim 1.
- 9. (New) Preparations according to claim 3, wherein R is chosen from the group consisting of the myristyl radical, the cetyl radical, the stearyl radical, and the eicosyl radical.
- 10. (New) Preparations according to claim 4, wherein up to seven of the radicals R¹-R⁸ are hydrogen atoms and one to eight of the radicals R¹-R⁸ are chosen from the group consisting of branched and unbranched alkanoyl groups having 8-20 carbon atoms.

Application No. To Be Assigned Applicant: Gunhild HAMER et al Preliminary Amendment

11. (New) Preparations according to claim 10, wherein at least one of the radicals R¹-R⁸ is the lauroyl radical or the myristoyl radical.
